

# CLIMATE ACTION TEAMS

## Proceso y resultados de la modelación de mitigación en Chile

Francisco J. Meza  
José Miguel Valdés

Mayo, 2022

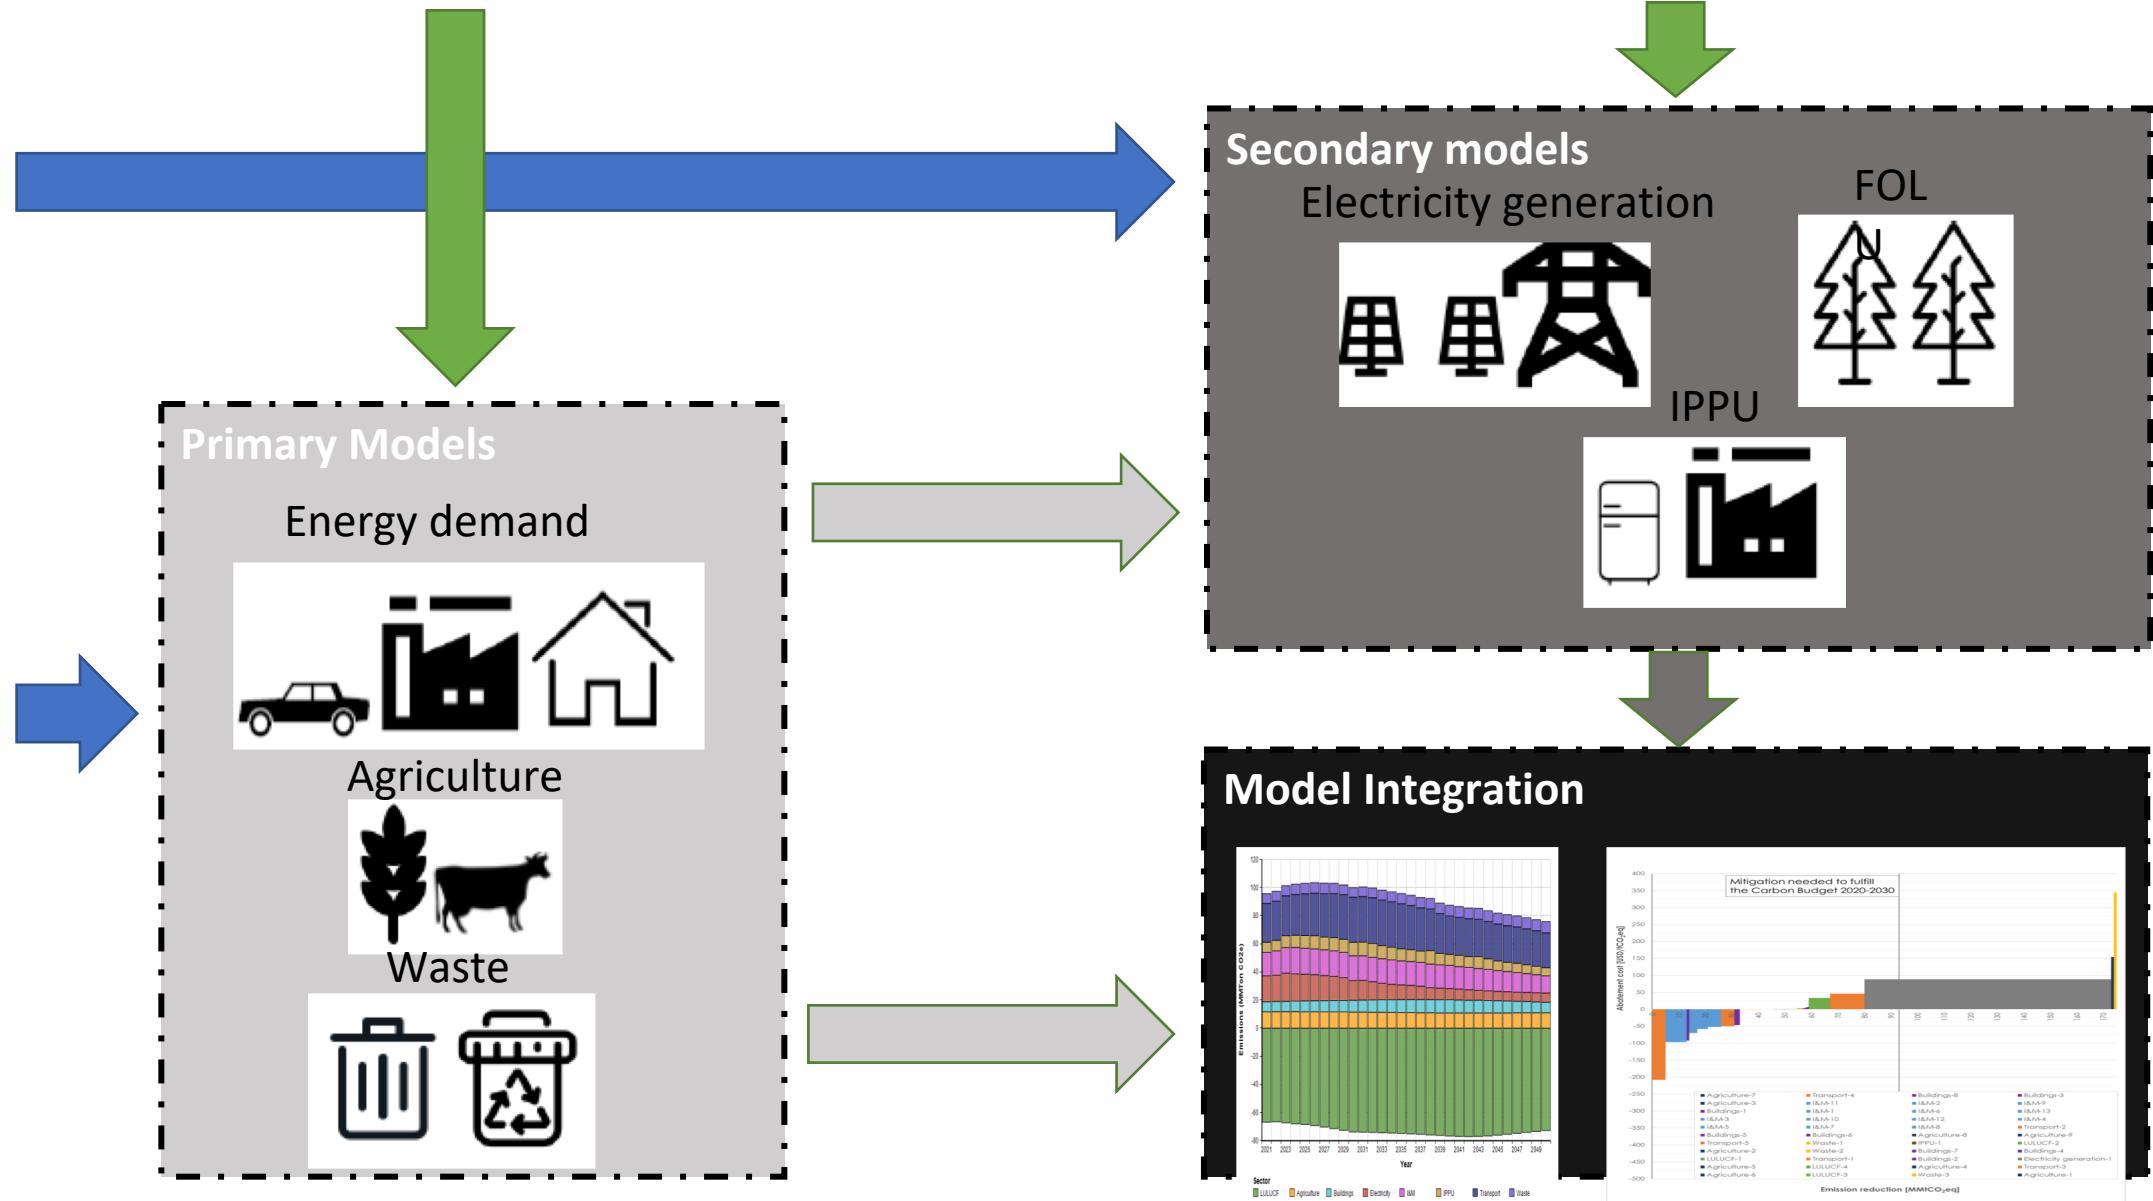

<http://cambioglobal.uc.cl>

# Objectives

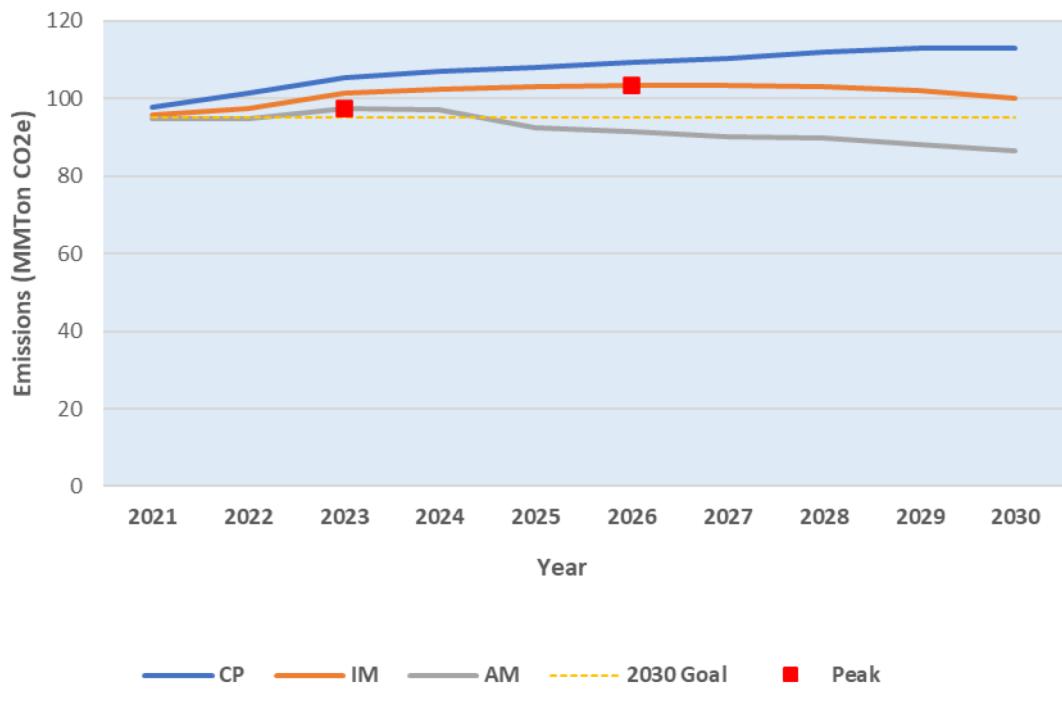

- To develop a greenhouse gas emission model incorporating all sectors available within the National Inventory System (INGEI)
- To model the effect of greenhouse gas mitigation actions
- To generate data for the discussion within the context of the Climate Teams Initiative

## Escenarios de acción climática

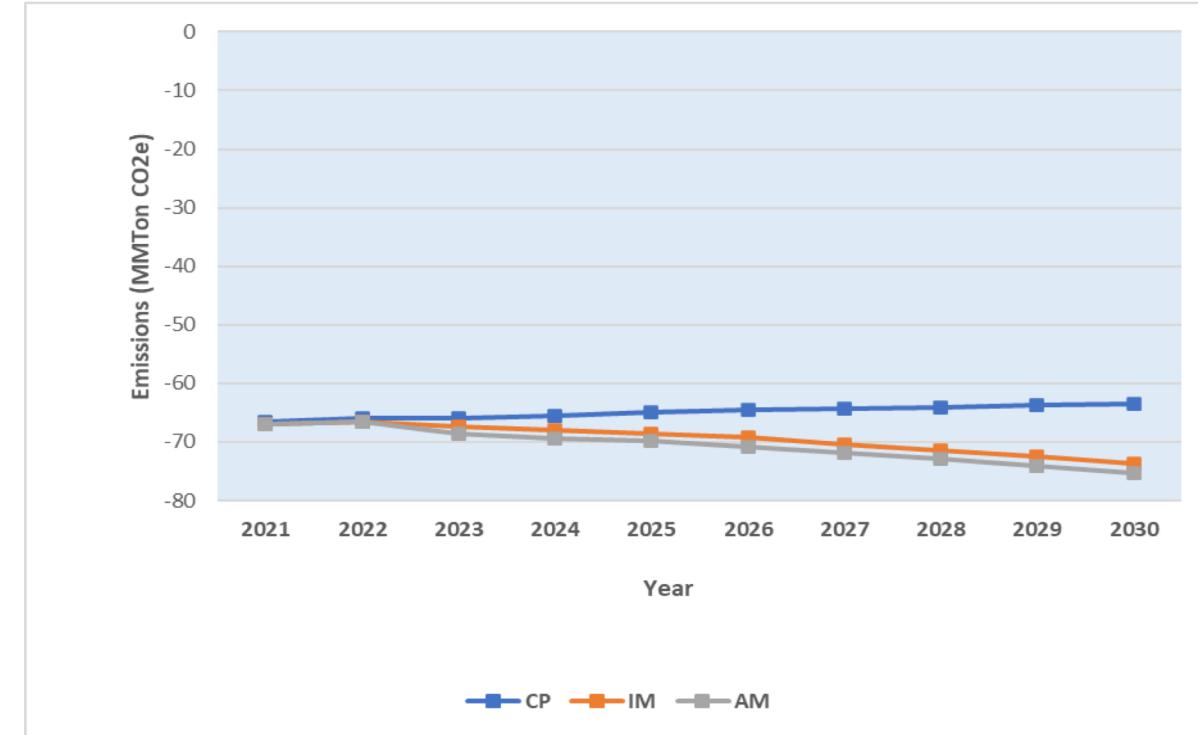

Futuros

# Proyección de emisiones 2021-2030

Total aggregated emissions of the carbon budget sector in three different scenarios in the period 2020-2030. Baseline: Reference

Total emissions of the LULUCF sector in three different scenarios in the period 2020-2030. Baseline: Reference
